Happy New Year 2012!!!!

As we start this year, we would like to say, "Thank You" to all of our customers for remaining faithful to us during these tough years.

We know things have been challenging during this economic hard time and we are grateful for your continued support. We understand you have a choice in selecting a pest control firm and appreciate you electing us as your pest control management team. Mrs. Bugfree has always strived to do our best in providing you in all aspects of your pest control needs.

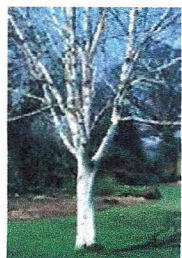

Winter
chills....

During the winter season, you will notice a change in our application technique. Winter conditions here in the Bay Area require our applicators to focus more on the perimeter of your home to establish an effective barrier that protects you and your family.

This season, we will be granulating the yard and emphasis will be around the structure of your home. The areas of concentration are:

- ❖ Perimeter of the home
- ❖ Eaves, Window Seals & Door Frames
- ❖ Foundation

Don't forget...dormant treatment will also be handled

Reminder...

We provide the following specialty services

▪ Rodent Control:

- Rat: Exclusion-sealing up entry points and setting out snap traps.
- Mice: Setting out tamper proof bait stations.

▪ Tree Spraying

- Oaks (Mar.-Apr.)
Prevent oak moths from damaging tree.
- Olive (Feb.-Mar.)
Pre-emergent treatment to prevent fruit from bearing on tree causing stains.
- Sycamore/Ash (Mar-Apr)
Control fungi disease, anthracnose, from damaging leaves and twigs.

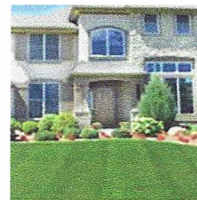

▪ Weed Control (Dec.-Feb.)

- Pre-emergent, Post-emergent control.

For those who are interested, you can now pay for your pest control service, 1 year in advance. This payment will also include the \$3 discount given to each prepaid service.

We will be accepting Visa and MasterCard for payments made IN FULL for 1 year service.

MRS. GREENLAWN
"The greener than green lawn"

Same people who bring you Mrs. Bugfree, Inc. bring you **Mrs. Greenlawn**

- ✓ Giving your lawn a slower, more steady supply of food to grass plants without shocking them into overdrive.
- ✓ Results are a thicker, naturally green lawn that requires less maintenance, pesticides & herbicides.
